BDI REACHES NEW HEIGHTS WITH CIRRUS 8158

Console-height home theater cabinet now shipping

CHANTILLY, VA. – April 5, 2010 – Sometimes the ideal TV height is just a step above the rest. For those places where the TV needs to be a little higher, such as the bedroom or game room, BDI has engineered the console-height Cirrus 8158 home theater cabinet. This innovative cabinet, designed by Matthew Weatherly, is now shipping to retailers worldwide.

Cirrus 8158 is the ideal choice for a flat panel TV (up to 60”) and a large home theater system, with space for a full array of electronics and media. Cirrus features sliding wood-framed doors with IR-friendly grey tinted glass that conceal two side compartments for electronic components. The center shelf can be easily adjusted, providing the ideal space for a center channel speaker or additional components. The drawer discreetly stores over 75 DVDs or CDs. For an alternative mounting option, Cirrus 8158 is compatible with BDI’s Arena Flat Panel TV Mount 9972, which allows a TV to stand even higher and swivel to always provide the best view.

Full of features designed to integrate the home theater into the home, Cirrus 8158 includes BDI’s signature innovations such as hidden wheels, integrated levelers, removable back panels, integrated cable management, adjustable shelves and flow-through ventilation. Constructed of sturdy CARB-compliant MDF, the Cirrus collection is beautifully finished with Natural Stained Cherry or Espresso on Oak wood veneers.

“Home theater cabinet design must evolve to continue to meet the needs of today’s consumers and systems,” says Bill Becker, CEO and Design Director of BDI. “Cirrus 8158 combines great proportions with a beautiful design and innovative features. At BDI, we believe in the importance of engineering a full range of designs to meet any space or home theater system demands.”
